Re: 2019 Enbridge Pipeline Depth of Cover Program

Dear Landowner,

Our records indicate that you own or have an interest in property that is crossed by an Enbridge pipeline. This letter is to notify you of upcoming monitoring activity planned to occur on the pipeline right-of-way in your area.

Beginning in the month of September 2019, Enbridge plans to conduct a depth of cover survey as part of our ongoing Pipeline Depth Monitoring Program for the Enbridge pipeline(s) that cross your property. This survey involves walking Enbridge's pipeline right-of-way and recording depths, making sure the pipelines are covered by an acceptable amount of soil to ensure protection and integrity of the pipeline. Monitoring will consist of using handheld electronic pipe locating equipment and probing to accurately locate the pipe and record its depth at regular intervals. This survey will be done via foot traffic only, therefore no property or crop damage is expected.

No additional attempts will be made to notify you, unless alternative access is needed due to physical access restrictions. If you have any concerns or special provisions that you would like to discuss ahead of time, please contact our contract ROW agent, Nancy Putman, at 708-497-5192.

Thank you in advance for the cooperation and courtesy extended to our crews.

Respectfully,

David Schultz
Sr. Advisor
